

# Threeo

**Name der Organisation:** Threeo

**erfasst als:** Band Trio

**Genre:** Jazz/Improvisierte Musik

**Subgenre:** Jazz

**Gründungsjahr:** 1988

The Austrian trio Threeo, lead by guitarist Gerald Gradwohl, is a vibrant fusion trio augmented by the presence of tenorman Bob Berg on this their latest cd. The group has a funky, high energy approach to fusion, as evidenced on their rhythm-changes tribute to Tribal Tech, "Technotronic" which features fine solos from the entire band. For fans of modern fusion with an edge!

**1997**

There are JazzRock-Formations that even kick ass jazz-wet blankets. Threeo is surly one of them.

## **1996**

An interesting Austrian trio: They dash through the well-proved jazz-rock-scenery - but they do it masterly and with style!

It's beautiful to see how diversified and surprising in a discreet way music like this still can be, when you let young talents do their stuff, instead of throwing "big names dices" in the GRP way.

## **1996**

Once there are beats that rock your feet, once there are eccentric rhythms where you can lose the time quite easily - top of the heap music in Dolby Surround Sound!

*Audio live*

With this terrific performance Threero doubtlessly is one of the big hopes of the Austrian jazz scene.

*Jazz Pub News*

Groovy rhythms, harmony in playing together, powerful arrangements and borderless fun in playing together - I'd wish there were more jazz like that!!!
