ÜberGehen ... is a composition for solo guitar (2021) using common jazz harmonies, inspired by classical jazz lines and jazz melodies, from circa mid-20th century. J.S.Bach also lent me some of his chordal progressions.

ÜberGehen ... your whole life is like mountaineering - not hiking or walking - you will always encounter obstacles, moguls behind which wonderful lakes are hidden. There are also views of the vast landscape, narrow passages to force through, large and small steps are required, you need to keep your balance and sometimes it is a great advantage to be free from giddiness! Sunshine and hail shred your face, wind caresses and rages, moments of happiness and shivers AND ... release...
